**CALIFORNIA
ENERGY COMMISSION**

*****FREE TRAINING*****

2016 ENERGY CODE UPDATE

Over the next few months, the local building officials group will be presenting ½ day single topic seminars relating to the 2016 Energy Code Requirements that go into effect on January 1, 2017. These presentations will be geared toward Developers, Architects, Engineers, Specifiers, Energy Consultants, and Plans Examiners. Their goal is to assist the development community in becoming familiar and comfortable with the requirements, and to acquire a level of knowledge to allow design for compliance in the most cost effective manner.

These seminars will be presented by staff representing the California Energy Commission and Energy Code Ace, the developers of the code. They have the ability to explain the complex requirements and to answer the vast array of questions you may have. These are critical opportunities in your path to designing and building for compliance with the 2016 Energy Code requirements.

TOPIC: RESIDENTIAL HVAC

**WHEN: Tuesday, October 24th, 2017 (rescheduled from 9/28)
8am-12 noon**

**WHERE: OLD MUNICIPAL BUILDING, 441 MAIN ST.,
