Station: Chico Avenues Neighborhood Association

1. Off street parking for each bedroom, a home has no issuing of building permits for remodel of parking is not included.
2. Improve the conditions of the roads! Remove bumps, etc!! Where there are no sidewalks and curbs add them! Add street lights! East Washington Ave. has no street lights, very dark.
3. On site parking: 1 space per bedroom.
4. Better street lighting.
5. Promote bus routes in the Avenues, residents get bus passes @ reduced rate or free.
6. Bike paths on 5th Ave. and any street that is being redone!
7. Alley cleanups!
8. Marking parking places in the Aves!
9. Preserve the Esplanade as Americas 4th best boulevard!! All other Esplanade improvement should be secondary.
10. There has to be bike lanes along Sac. Ave between Esplanade and Warner.
11. Bike path on 5th Ave.
12. Traffic Calming: 32 street width max-new lighting fixture designs for all infill- bulb outs at corner- wavy streets like new 8th street corridor- use street design to calm traffic- more roundabouts.
13. Improve livability in the Avenues by slowing traffic, increasing bike and pedestrian safety, and improving/maintaining housing stock.
14. Restricted parking. Would like permit parking from 8 to 6 on week nights. Also the permit will deal with illegal second unit parking because each legal unit will have parking for each bedroom. Additional permits at a cost.
