

Circulation Action Group Meeting Summary
November 5, 2008
5:00 PM
Home of Cindy Maderos

Temporary Bulbouts. Letters were sent to all property owners adjacent to the 1st & Oleander and 1st & Magnolia intersections. Staff received phone inquiries but no objections or issues were raised by adjacent property owners. Based on staff's further review, a left turn limitation during peak hours will be required at 1st & Oleander due to avoid increased congestion. The group discussed the bulbouts representing potential difficulties for bikes. Staff will bring the request for temporary bulbouts to the first available Internal Affairs Committee in 2009. Targeting January but it may be February.

Radar Speed Indicators. Bids were requested and speed indicators are expected to be purchased in December and installed as soon as practicable after the new year.

Other Issues. The group discussed the effect on neighborhood streets of a loss of parking at Chico High as a result of the planned new building on West Sacramento Ave. The group also discussed potential items for focus in the coming year including a neighborhood-wide traffic/transportation forum.

The next meeting was not scheduled.
