Environmental Impact Report for the Bidwell Ranch Specific Plan	Х	x			Х	x		x		
Abstract:										
This draft environmental impact report (EIR) was prepared to assess the impacts of Bidwell Ranch Specific Plan (June 1, 1994) project, pursuant to the California Environmental Quality Act (CEQA) (Pub. Res. Code. Section 2100 et seq.), the State CEQA Guidelines (14 CCR 15000 et seq.), and the City of Chico (City) environmental review guidelines. The staff determined that the following issues were of concern and should be addressed in the EIR: earth, water, plant life, animal life, noise, land use, population, housing, transportaiton and circulation, public services, utilities, aesthetics, recreation, and cultural resources.

Amended Rancho Arroyo Specific Plan	Χ									
Abstract: The City of Chico adopted a Specific Plan for the Rancho Arroyo Community which established land use designations and permitted densities, plus detailed design and development standards. The approved Specific Plan included statements and policies pertaining to existing conditions, planning policies, development standards, capital improvements, and other regulatory schemes.

Chico, City of. Community Development Department, Planning Division. October 1985. Amended rancho arroyo specific plan. Chico, Ca. Prepared by Crocker Development Company.										
Administrative Draft Bidwell Ranch Specific Plan	X									
Abstract: The purpose of the Bidwell Ranch Specific Plan is to designate land uses, a circulation pattern, public facilities, development policies and standards for the Plan Area and establish the methods of implementing the specfic programs. Bidwell Ranch is envisioned as a distinct village within the Chico communtiy. The site is surrounded on three sides by substantial permanent open space, including Bidwell Park and is seperated from existing and future residential areas by the Sycamore Creek Diversion Channel. Within this distinct setting Bidwell Ranch will provide a residential neighborhood with a variety of dwelling unit types and sizes.

Bidwell Ranch Administrative Draft, Specific Plan: The purpose of the Bidwell Ranch Specific Plan is to designate land uses, a circulation pattern, public facilities, development policies and standards for the Plan Area and establish the methods of implementing the specfic programs. Bidwell Ranch is envisioned as a distinct village within the Chico community. The site is surrounded on three sides by substantial permanent open space, including Bidwell Park and is seperated from existing and future residential areas by the Sycamore Creek Diversion Channel. Within this distinct setting Bidwell Ranch will provide a residential neighborhood with a variety of dwelling unit types and sizes.								
Conceptual Wetland Mitigation Plan for the Bidwell Ranch Specific Plan Area: This wetland mitigation plan describes goals and related objectives, construction techniques, monitoring requirements, performance standards, and an implementation schedule for creating vernal pool, clay flat, and ephemeral drainage wetland habitat as mitigation for impacts associated with implementation of the Bidwell Ranch Specific Plan.								
Reference: Chico, City of. Community Services Department. October 1991. Conceptual wetland mitigation plan for the bidwell ranch specific plan area. Chico, Ca. Prepared by Jones & Stokes Associates, Inc. Sacramento, Ca.								
Constraints Analysis for the Rancho Arroyo Specific Plan Project: The purpose of this constraints analysis is to identify locations within the northeastern and northwestern portions of the proposed specific plan area where noticeable development constraints or opportunities exist. This information will be used by the city and the project applicant as a tool to locate and design the proposed single-family residential, junior high school, elementary school, neighborhood park, and community park uses in areas whre development would be the least environmentally damaging. In addition, this constraints analysis will be used to locate and designate the exact location of the city's Butte County meadowfoam core preserve.

Bidwell Ranch Specific Plan Amendment File # 3	x			х	х		X	
Abstract: Compiled correspondence letters, minutes, and compiled work plans, budgets, and development agreements. The work plan consists of six tasks including: Initiatine project, preparing adminstraitve final EIR, preparing final EIR, preparing mitigation monitoring programs, attending coordination meetings and attending two public meetings. Placing 4,159 people and a junior high next to the potential Ranch Arroyo Butte County Meadowfoam Core								
Preserve, can not be reduced to a level of insignificance. The placement of this development next to a state listed (and proposed federally listed) endangered plant preserve would be counter-productive to the goals the city set forth in their selection and adoption of the Rancho Arroyo core population conservation

G.P. Amendment # 90-2 and Rez. # 413 (Hackart) - Rancho Arroyo	Х	х			х				
Abstract: Agreement to prepare a wetland mitigaiton plan for the Rancho Arroyo property and Butte County Air Pollution Control District Comments. "The Fish and Wildlife Service has reviewed the Notice of Preparation of a Draft Environmental Impact Report for the Rancho Arroyo Specific Plan. The proposal includes residential and limited commercial development on approximately 749 acres northeast of the City of Chico. The following general comments are provided to assist the City in preparing the Draft Report." This includes Affected environment, description of the proposed project, wetlands and other wildlife habitats, mitigation planning, mitigation monitoring, and endangered species. "The 1986 specific plan EIR did not adequately discuss the endangered Limnanthes. Surveys for limnanthes in that EIR incorrectly identified BCM as another Limnanthes floccosa subspecies."

Rancho Arroyo Draft Specific Plan Abstract:	X				Х				
The Specific Plan was developed by identifying environmental constraints to development of the property - arroyos, wetlands, rare and endangered plant species, slope and vegetation - and then establishing a specific plan which, to the extent feasible, avoids developemtn on environmentally sensitive lands. The location and configuration of development, particularly the multi-family, reflects avoidance of development in wetlands and along arroyos. In 1989, the city of Chico enacted an ordinance which adopted a

Bidwell Ranch Traffic Analysis	Х							
Abstract: This report presents a traffic analysis for the Bidwell Ranch Specific Plan in the northeast area of the City of Chico. This analysis utilizes existing project description information from the Draft Bidwell Ranch Specific Plan, June 1, 1994, and the Draft EIR for the Bidwell Ranch Specific Plan, October 1994 by Jones & stokes Associates, Inc. W-Trans was retained by the City of Chico to perform the following tasks, 1) perfom a qualitative review of the City's traffic model in order to verify its accuracy and projection capabilities, 2) review the previous traffic analysis scope fo work and provide necessary modifications as appropriate, and 3) complete an updated traffic analysis.

Proposal for the Preparation of a draft Environmental Impact Report Abstract:	Χ							
This is a proposal to prepare a draft environmental impact report (EIR) for the Rancho Arroyo Specific Plan. In 1986 - 1987, Jones and Stokes Associates prepared an EIR for the Rancho Arroyo Specific Plan that was certified by the city. Chico voters subsequently rejected the specific plan in a referandum. Jones & Stokes Associates has been requested to prepare a new EIR on a new specific plan. The Rancho Arroyo Draft Specific Plan identifies the following pruposes: to designate land uses and zoning withing the plan area, to identify a trasnportation and circulation configuration, to identfy required public services and facilities, to establish development policies and standards for the plan area, and to establish a program for implementing the specific features of the plan. <u>Draft Bidwell Ranch Specific Plan</u>											
Abstract:											
Bidwell Ranch is a envisioned as a distinct community with strong visual and circulation connections to the existing Chico community. The site is surrounded on three sides by substantial, permanent open space. Over 60 percent of the plan area will be left in natural open space to form a greenway around the urban portions fo the plan to provide a continuous open space corridor from Bidwell Park to the city edge. The open space will protect and preserve sensitive environments and establish a buffer from Bidwell Park which will be nearly one half mile wide from the Wildwood Avenue Bridge to the nearest planned dwelling units.

Foothill Park East and Bidwell Ranch Aircraft Operation Impact and Conflicts Study	Х										
Abstract:											
This study was contracted by the City of Chico to determine the compatibility between the proposed development of Foothill Park East and departure of laden fire-fighting aircraft from Chico Muni. The study assessed the crash hazard potential and noise impacts from laden fire-fighting aircraft departure operations on proposed communities beneath the departure flight tracks. If land use incompatibilities were found to exist, the study then identified appropriate mitigation measures.

Bidwell Ranch Butte County Meadowfoam Survey		X			Х					
Abstract:										
Winter rainfall and inundation had been sufficient to allow for successful BCM seed germination. Butte County meadowfoam seedlings are known to tolerate brief periods of submergence. Therefore, the amount of the flowering heads was not expected to diminish severely due to the unseasonably long rainy period. However, the reduced photoperiod was expected to affect the amount of completely open flowers compared to the 2005 bloom.

Conceptual Wetland Mitigation Plan for the Bidwell Ranch Specific Plan Area Abstract:	Χ								
This wetland mitigation plan describes goals and related objectives, construction techniques, monitoring requirements, performance standards, and an implementation schedule for creating vernal poos, clay flat, and ephemeral drainage wetland habitat as mitigation for impacts associated with implementation of the Bidwell Ranch Specific Plan. The mitigation measueres in this plan provide for wetland replacement as compensation for the filling of jurisdictional wetlands, as required by the U.S. Army Corps of Engineers.

Bidwell Ranch Wetlands Mitigation Opportunities Analysis Ending 12/2004	X	Х							
Abstract: Compiled Memorandum from 2000-2004, receipts, professional sevice agreements, Bidwell Ranch Wetland Mitigation Opportunities Preliminary study, and assorted maps. "At the City Council meeting of October 5, 2004, the City Council took no action on the Planning Commission recommendation to designate and zone Bidwell Ranch to open space. After the vote was taken several of the Council meembers who voted to oppose the rezone indicated their desire to receive additional information and potentially revisiting the issue." "Seasonal Wetland is a broad term applied to all wetlands that do not contain water year-round. Some seasonal wetlands contain water only briefly during the rainy season, others may retain water well into summer."

Archaeological Inventory Survey

CONFIDENTIAL

Abstract:

This report details the results of an archaeological inventory survey of the proposed Bidwell Ranch Subdivision project area which encompasses approximately 750 acresof land located in northeast Chico, Butte County, Califonia. The property is situated adjacent to the north side of Wildwood Avenue and Bidwell Park, is bordered along the east by the Cottonwood-Elverta #3 electrical transmission line, and is bounded along the west by the Sycamore Creek Division Channel and the Foothill Ranch residential subdivision. Pg 5- "consisits of a scatter of basalt waste flakes and tools and three shallow bedrock mortars. The site is located in an area of large, exposed basalt boulders adjacent to an ephemeral drainage channel. Previous disturbance to the site has resulted from the construction of a gravel road along the southern site boundary and the construction of a metal power line tower in the eastern portion of the site."
