## Neighborhood Meeting - Salem Street Bridge Replacement Project

### Neighborhood Meeting

Please join us for an update on the Salem Street Bridge Replacement Project

*When: Tuesday, May 24, 2022, at 5:30pm*

*Where: NDGW, Annie K. Bidwell Parlor No. 168, 965 Salem Street, Chico, CA 95928*

#### Introduction

The City of Chico has obtained funding to replace the structurally deficient and functionally obsolete Salem Street Bridge over Little Chico Creek.

#### Where is the project located?

The bridge is located between W. 9<sup>th</sup> Street and W. 10<sup>th</sup> Street and provides a link between the Barber neighborhood and Downtown.

#### What is the project?

The existing bridge, constructed in 1916, suffers from the following deficiencies:

- The bridge width has no shoulders and narrow lengths which do not meet current car and bicyclist safety standards.
- The sidewalks have steep approaches which do not meet ADA standards.
- There is erosion at the west abutment with some undermining of the wall.
- Various concrete girders and the overhangs are showing signs of deterioration.

To address these concerns, the City is planning to replace the existing structure with a new bridge along the same alignment. The new structure will accommodate 2 lanes of traffic, 5-foot bike lanes, and sidewalks. To facilitate construction, the bridge and a portion of Salem Street will be temporary closed to traffic.

#### Additional Information

For additional information regarding this project, please visit the Project's webpage by entering in the following webpage, or scanning the QR code: <https://chico.ca.us/post/salem-bridge-replacement-project>
